

# CORE AERATOR

<http://tiny.cc/coreaerator>

## FEATURES & BENEFITS

- Holes stay open for a long time
- Suitable for heavy clay soils

The core aerator penetrates the ground pulling plugs of grass and soil from the ground, leaving the plugs behind. The holes created enable air, fertilizer, and water to effectively reach the lawn roots in heavy clay soils.

Core aerator penetration depth is easily controlled using the two guidewheels, providing consistent results. The spike aerator is also equipped with mechanical support legs which lift the blades off the ground for storage. It is the ideal attachment for gardens and sports fields maintenance where MultiOne machines, thanks to their traction system, don't damage the turf.

**Note: suggested floating boom valve on machine.**
